

1933.

WESTERN AUSTRALIA.

# Quarterly Statistical Abstract

(The preliminary figures published in this Abstract are, as far as possible, revised every quarter. Those which appear in this issue consequently supersede any contained in previous issues.)

No. 271.

To 30th September, 1933.

Compiled from Official Returns.

S. BENNETT, F.I.A.  
Government Statistician.

PERTH:

BY AUTHORITY: FRED. WM. SIMPSON, GOVERNMENT PRINTER.

1933.

# STATISTICS OF WESTERN AUSTRALIA.

NOTE.—The figures in respect of the State's population as disclosed by the Census of June last are: Males 234,000; Females 204,948—Total 438,948. Sufficient data are not yet available to make practicable the revision of the estimated population as based on the 1921 Census, which is used in the Abstract and upon which the per capita figures are calculated.

## I.—POPULATION AND VITAL STATISTICS.

Population of Metropolitan Area, Estimate, 31st December, 1932, Males, 103,600; Females, 104,900; Total, 208,500.

No. 1.—Population of Western Australia (exclusive of full-blood Aboriginals\*) from 1923.

Period.	Estimated Population on last day of period.			Increase during period.	Masculinity.†	Mean Population.
	Males.	Females.	Total.			
1923 ...	189,429	164,386	353,815	10,207	7·08	348,275
1928 ...	220,209	185,664	405,873	13,581	8·51	399,082
1929 ...	225,861	190,902	416,763	10,890	8·39	411,318
1930 ...	226,713	193,893	420,606	3,843	7·80	418,627
1931 ...	225,586	196,023	421,609	1,003	7·01	420,794
1932 ...	225,614	197,578	423,192	1,583	6·62	422,436
First Quarter, 1933	225,901	198,282	424,183	991	6·51	423,687
Second Quarter, 1933	226,190	198,985	425,175	992	6·40	424,679
July, 1933 ...	226,167	199,211	425,378	203	6·34	425,276
August, 1933 ...	226,284	199,507	425,791	413	6·29	425,584
September, 1933 ...	226,469	199,782	426,251	460	6·26	426,021
Third Quarter, 1933 ...	226,469	199,782	426,251	1,076	6·26	425,713

\* Estimated Full-blood Aboriginal Population in the State on 30th June, 1933: 25,623.    † Number of Males over Females in each 100 of total population.

No. 2.—Arrivals in and Departures\* from Western Australia from 1923.

Period.	Arrivals.			Departures.†			Excess of Arrivals over Departures.		
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.
1923 ...	21,617	12,218	33,835	17,681	10,871	28,552	3,936	1,347	5,283
1928 ...	22,781	13,258	36,039	16,464	11,058	27,522	6,317	2,200	8,517

## XV.—METEOROLOGICAL STATISTICS.

(Supplied by the Commonwealth Meteorologist, Mr. W. S. Watt.)

### No. 42.—Notes on the Rainfall of Western Australia during the months of July, August, and September, 1933.

*July.*—The rainfall during the month can be divided into the results obtained from three separate depressions which advanced through the State from the Indian Ocean on the 3rd, 10th, and 25th to 27th. Some comparatively slight gaugings were registered on other days but, apart from the time occupied by the passage of the three depressions, the weather in the main was marked by rather long intervals of High Pressure during which bright, sunny days with cold nights were experienced, and minima as a whole were lower than usual.

In most instances the July registrations were below the average. The biggest aggregate occurred over South-West coastal areas and in the lower South-West. Cape Leeuwin measured 7.89 inches, followed by Jarrahdale with 6.71, Denmark 6.09, and Greenbushes 5.95 inches.

Throughout the wheat belt the falls were necessarily smaller. In the Midland country and along the Wongan Hills line the totals were unevenly distributed, and the deficiencies ranged from about a quarter of an inch to nearly two inches. At the North-Eastern, Central, and Southern portions, the deficiencies varied from little less than half an inch to an inch and a-half. These deficiencies were certainly high but were not exceptional. Other years in which July was dry were 1884, 1889, 1914, 1923, and 1929.

Throughout the pastoral country including the De Grey, some good falls were received, chiefly on the 5th, 10th, 18th to 20th, and on the 26th.

In the De Grey and Gascoyne the month's totals were in many instances above the average, but on the Goldfields the totals showed slight defects, and here the need of a good soaking downpour was eagerly awaited.

With such a sequence of cold nights, which were experienced also in the Metropolitan area, minima were lower than usual, but day temperatures showed little difference from the usual monthly readings.

Some severe gales were experienced during the course of the month across the Bight, and shipping had an unenviable experience. In Perth, winds reaching gale force were encountered on the 24th and 25th.

*August.*—The development of the high pressure areas to the South of the State, similar to those of last April, were a feature of the pressure systems during the first three weeks of August, and the want of a really good rain throughout the wheat-belt was causing considerable anxiety. Rain was noted on the 3rd, but the only good falls were confined to the North and a few of the North-Eastern portions; the remaining districts reporting almost negligible results.

A period of fine, bright weather, with cold nights and drying winds, ensued before the next rain on the 18th was measured. Here again, the falls were mostly light, except at a few central and southern districts, and the position was not relieved until the 24th, when the first falls, ushering in a widespread tropical rain, were received. These continued till the 27th and were then linked up with another disturbance which resulted in further rains, bringing the monthly totals either above or very little short of the average.

The pastoral divisions also derived considerable benefit from the depression which passed over the wheat belt, particularly during the last week, while an unusual rain in the Kimberley District on the 10th and 11th brought the month's totals above average.

In the Fortescue, Gascoyne and Goldfields country, the same splendid registrations were effected between the 24th and 31st, the Fortescue leading with 266 points at Onslow and 203 points at Mardie. Throughout the Gascoyne and Goldfields the falls were widespread on the 24th, 25th, 26th and 30th, and in the latter division, which was in need of a good rain, the falls were most opportune.

*September.*—The good rains which were experienced in Western Australia during the last week of August, and did so much to brighten the seasonal outlook, were followed during September by further showery spells from the Gascoyne Southwards, and although the falls over the wheat-belt were generally light to moderate on these occasions, they were beneficial, and reports at the end of the month indicated, that the crops, although short, were promising well in most districts.

The first few days of the month were mostly fine under high-pressure control, but on the 5th and 6th a disturbance brought useful rains generally South from Gascoyne, and these were followed on the 8th by further showers which accompanied another disturbance. A short spell of fine weather followed, but this was soon followed by a series of disturbances, which, between the 14th and 17th, brought useful falls again from the Gascoyne Southwards. A longer period of fine weather then set in, which, in the agricultural districts, continued till the end of the month, except for a few very light and scattered showers. The South-West coastal areas received light falls about the 26th, and a fairly extensive belt of rain was experienced from parts of the Gascoyne across the Goldfields to the far South East on the 27th and 28th. The last day of the month witnessed the development of another disturbance, which, during the opening days of October, brought another widespread light to moderate and useful rain through the wheat-belt and the West and South-West coastal areas.

The total rainfall for the month was generally below normal, but the deficiency was largely offset by the distribution of the falls through the period. The North Coastal and North Central subdivisions averaged 70 to 80 points for the month, the South Central subdivision about 120 points and the South-West coastal areas about 250 to 400 points.

Practically no rain was recorded in the Kimberley, De Grey and Fortescue divisions, and the Gascoyne received only from 20 to 30 points. Over the Goldfields the falls amounted to over 50 points at several places, although the majority of stations registered only from 20 to 40 points.

\* Minus sign (—) indicates a decrease.

<sup>a</sup> Includes Migratory Population (persons on board ships, trains, etc.), which is not included in any subdivision of the State. <sup>b</sup> Incomplete owing to defective collection in certain cases. <sup>c</sup> Estimated on the basis of all private dwellings. <sup>†</sup> The numbers of occupied private dwellings in 1921 in the Urban and Rural portions of the State respectively, grouped according to the material of the outer walls, were: Stone or brick, 20,467 and 4,076; Wood, 14,769 and 14,128; Iron, 2,724 and 6,177; Calico, Canvas, Hessian, etc., 147 and 4,927; Sun-dried bricks, 67 and 1,611; all other, 248 and 844. For 1911 throughout the whole State the totals grouped under the same materials were: 18,917; 20,611; 10,109; 14,216; 1,530; 1,170. In 1921 dwellings occupied by owners numbered in the Urban and Rural districts respectively 14,100 and 18,000; by Purchasers by instalments, 6,809 and 1,889; by tenants, 16,252 and 7,654.

## XIX.—MID-MONTHLY EMPLOYMENT IN WESTERN AUSTRALIAN FACTORIES.

No. 49.—Index numbers representing the Trend of Employment in Factories and Works, compiled on the basis of monthly returns specially collected from establishments which furnish approximately 35 per cent. of the total employment in Secondary Industries.

The Annual Mean Employment for the year 1929-30 has been taken as a base equalling 100. The index number for 1930-31 fell to 77. The indices in the table hereunder show the fluctuations in the Number of Employees on the Pay Roll on or about the 15th day of each month, from July, 1931 to June, 1933.

Year.	Jan.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.
